Claims 1-10 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 remain rejected under 35 U.S.C. 103(a) as being unpatentable over the WO '684 reference.

The reference teaches an absorbent article which absorbs body exudates. The reference teaches a liquid pervious topsheet and a liquid impervious backsheet which is joined to the topsheet. The topsheet is disposed at the body surface and the backsheet is disposed at the garment surface. The reference teaches an absorbent core which is located between the topsheet and the backsheet (see page 7, lines 19-35, page 8, lines 1-10 and see figs. 1-4). The topsheet has a skin care composition disposed thereon (see page 15, lines 24 and 25).

WO '684 does not particularly teach a skin care composition of greater basis weight than the preferential acquisition zone.

However, absent a showing in the criticality in the skin care composition having a greater basis weight than the preferential acquisition zone, there are no unexpected results. The prior art provides the same result. The reference teaches an absorbent article comprising a topsheet, a backsheet, and an absorbent core located therebetween, an acquisition zone and a skin care composition disposed thereon. WO

Art Unit: 1615

'684 teaches that the configuration and construction of the absorbent core may have varying acquisition zones (i.e. lower average density and lower average basis weight zones)(see page 8, lines 26-30), and that the size and absorbent capacity of the absorbent core may be varied to accommodate different uses such as diapers and sanitary napkins to accommodate the wearer.

It would have been within the skill of the ordinary practitioner at the time the invention was made to use the teachings of the WO '684 reference, with the expectation of achieving an absorbent article comprising a skin care composition which is known in the art for absorbing body exudates as instantly claimed. Therefore, it would have been obvious to claim an absorbent article, comprising a topsheet, a backsheet, and an absorbent core located therebetween, including a skin care composition disposed on the topsheet of the absorbent article.

Response to Arguments

Applicant's arguments filed 3/22/04 have been fully considered but they are not persuasive. Applicant argues that neither the WO '684 nor the WO '530 reference teach or suggest the application of differing basis weights of the skin care composition.

In response to applicant's arguments, the scope of the claims fail to distinguish over the prior art teachings an absorbent article which may have varying acquisition zones (i.e. lower average basis weight zones and lower average density) See page 8, lines 26-30.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
